PROFESSIONAL SUMMARY

Computer Science (AI & ML) student with hands-on experience building end-to-end AI systems, LLM-integrated pipelines, and multi-agent workflows. Proficient in Python, NLP, and RAG-based architectures. Demonstrated ability to design autonomous AI solutions with tool use, reinforcement learning, and vector-store memory — directly aligned with agentic AI development.

TECHNICAL SKILLS

AI / Agentic AI: LLM Integration, Multi-Agent Pipelines, RAG, ReAct Prompting, Reinforcement Learning (Q-Learning, MDP)

LLM Tools: GROQ API, Function Calling, JSON Outputs, Prompt Engineering

Vector / Memory: Embedding Strategies, Context Retrieval (FAISS/Chroma familiarity)

Programming: Python, SQL

ML / DL: Machine Learning, Deep Learning, Computer Vision, NLP, Transfer Learning (YOLOv8)

Tools: Streamlit, Git, GitHub, Jupyter Notebook, Pandas, NumPy

EXPERIENCE

Project Intern | IIT Tirupati *July – Sept 2025*

- Developed an AR-based campus navigation and treasure-hunt Android application using ARCore/Sceneform and Mappls, enabling location-aware AR clues, real-time navigation, and interactive discovery of campus infrastructure.
- Integrated Firebase Authentication/Database, location services, and AR-triggered multimedia to deliver a gamified navigation experience that guides users through campus landmarks and automatically presents building-specific content upon reaching destinations.

PROJECTS

LinkLedger – AI-Powered Opportunity Organizer | Python, GROQ API (LLM), NLP

Feb 2026

- Designed a multi-agent NLP pipeline using GROQ LLM API to autonomously extract, categorize, and summarize career opportunities from unstructured social media text — directly demonstrates agentic tool-use and multi-agent collaboration patterns.
- Implemented AI-based automatic categorization, deadline detection, and automated email reminders — end-to-end agentic workflow with minimal human intervention.

Difficulty-Level Adaptive Quiz using Reinforcement Learning | Python, Q-Learning, LLM

May 2026

- Modeled quiz system as a Markov Decision Process (MDP) with user-performance states, difficulty-level actions, and reward signals; implemented Q-learning with ϵ -greedy policy for dynamic adaptation.
- Integrated LLM for generating contextual quiz questions and feedback, showcasing LLM function-calling and tool-execution within an autonomous decision loop.

AI-Powered Assistant for Visually Impaired | Python, Computer Vision, YOLOv8

Nov 2025

- Developed a real-time YOLOv8-based object detection system for assistive navigation
- Integrated voice-based feedback for real-time navigation support and processed live camera input and optimized model performance for practical usability

EDUCATION

B.Tech – Computer Science (AI & ML)

Gayatri Vidya Parishad College of Engineering,
Visakhapatnam CGPA: 9.2 | Sept 2023 – Present

Intermediate | Sri Chaitanya IIT Academy

Percentage: 97.3% | June 2021 – May 2023

ACHIEVEMENTS & CERTIFICATIONS

Achievements

- GATE DA 2026 – AIR 4561 (Top 5%) | Data Science & AI
- Winner – SheHack 2026 Hackathon (1st Prize)

Certifications

- Cisco Networking Academy – AI Foundation
- Infosys SpringBoard – Machine Learning using Python
- McKinsey Forward Program Graduate
